

School Calendar

Annually, by March 1, the superintendent will prepare several possible calendars for study purposes. These calendars will be reviewed with the principal. The principal will explain the options available to their staff members. Staff will be asked to express their preference through an advisory ballot.

Parents will be advised of the possible calendars under study for the following year. They will be encouraged to express their opinions. Results of these surveys will be presented to the board at its March meeting. The board shall be asked to adopt a calendar or calendars no later than the May meeting.
